OUTPUT AND PROFITS MADE LAST YEAR.

The Financier has an interesting article or subber resu'ts which we take the liberty of quoting in full: It says :-

Of the rubber-producing companies which make up their accounts to December 31, a large number, lucluding leading and representative undartakings like Anglo Malay, the Damansara, the Labu, and the Pataling have already issued their reports for year, so that it is now possible to form some general conclusions regarding the progress of the industry during that period. Of the results disclosed in the accounts now available it may be said at the outset that they fulfil the most sanguine expectations. Actual outputs have appreciably exceeded the estimates of a year [383 ago, while the average prices realised have substantially surpassed those obtained in 1908. Moreover the cost of production has been reduced, and some of the most prominent companies hold out hopes of a further curtailment of expenses in the current year. With conditions affecting receipts and expenses so favourable as they actually were, it was inevitable that profits should show a handsome improvement. The rise in net earnings is in most cases of sensational dimensions. The resulting enhancement of dividends is no less imposing. Taken all round, the results now reported must be regarded as affording striking evidence of the prosperity of this marvellous industry. The success achieved so far is almost without parallel in the annals of commercial enterprise. Hardly ever before has a new industry within so short a space of time attained to a condition of such pronounced prosperity as that now enjoyed by subber planting in the Middle East, and

upon the capital employed in it. In the following table is shown a comparison for the past two years of the net profits and dividends of a baker's dram of producing companies whose annual reports have recently come to hand:-

-Netprofits- - Dividend -

never before has any industry, not even gold

mining itself, yielded such a magnificent return

Pataling 34,562 10,754, 1251,45 St. George 6,858 561 10 -The striking progress revealed in the above igures hardly needs to be enlarged upon The figures, indeed, speak for themselves In every single case improvement is recorded, and in many instances the expansion in profits and the corresponding increase in dividends assume quite impressing proportions. Take, for instance, the case of the Anglo-Malay Company, whose profits have increased by 140 per cent., and whose dividend has been raised from 30 to 80 per cent. The progress established by the Qamansara Company is even more remarkable, profits having expanded by over 250 per cent., and the dividend having been increased avefold. The Patation, too, has made improving headway, and thanks to its comparatively modest capitalisation, this company is able to declare by far the highest dividend of the undertakings under review. The Labu it another enterorise which has made very fine progress, and which, despite the fact that only a small proportion of its trees are in bearing, lealready able to reward its shareholders with a generous dividend. The B to Caves and the Golden Hope companies have likewise secured handsome additions to their profits, and have augmented their dividends" to a corresponding

The bandsome increase in profits and dividends above recorded was due partly to enlarged production and partly to enhanced selling prices, both favourable factors, proving 'a very strong combination. How prices improved will be seen from the following comp)rison of the averages obtained by ten companies during the past two years :---

Average selling price per lb.

Company. Anglo-Malay ... Batu Caves Damansara General Caylon. 7 7 Hanipha' Golden Hope ... Harpenden Labu Pataling St. George

The Anglo-Malay and the Pataling companies do not appear to have felt the full effect of the increase in the value of subber. That disadvantage, however, was neutralised by the comparatively large expansion in their production. In the case of the Batu Caves, the Damannars. the General Ceylor, the Harpenden and the Labo the rise in the prices realised was very marked, and contributed in no small measure to the expansion in net profits. In illustration of the increase in production the following comparative statistics, giving the actual outputs in 1909-the estimated and actual outputs in 1909.

formed a year ago. If calculation regarding the current year's production are similarly exceeded, the results to be reparted twelve months bence will surpass the most sunguine anticipations now current. Especially notable are the large additions to production foreshadowed by the Batu Caves, Harpendon, Labu and Pataling companies. Besides enjoying a big expansion in production in the current year, all the producing companies will have the benefit of a substantial rise in prices,

THERAPION MAY NOW ALSO BE OBTAINED IN DRAGRE (TASTELESS) FORM.

THE NEW FRENCH REMEDY THERAPION

This successful and highly popular remedy, used in the Continental Hospitals by Ricord, Rostan, Johert, Velpeau and others, combines all the desiderate to be sought in a medicine of the kind, and surpasses every-thing hitherto employed.

THERAPION NO. I markably short time often a few days only, removes all discharges, effectually superseding injections, the use of
which does irreparable harm by laying the foundation of
stricture and other serious diseases. In dysentery, piles,
irritation of the lower bowel, cough, bronchitis, asthma,
and some of the more trying complaints of this kind, it
will be found astonishingly efficacious, affording prompt
relief where other well-tried remedies have been powerless.

THERAPION NO. 2 for important of blood, acurvy, pimples, spots, blotches, pains and swelling of loints, secondary symptoms, goul, rheumatism, and all diseases for which it has been too much a fash ton to employ more ury, sarsaparilla, &c., to the destruction of sufferers' tooth and ruin of health. This preparation purifies the whole system through the blood, and thoroughly eliminates all poisonous matter from the body. THERAPION NO.3 for cate tion, aleeplessness, and all distressing consequences of

dissipation, worry, overwork, early error, excess, &c. It possesses surprising power in restoring strength and vigour to those suffering from enervating influences of long residence in hot, unbraitby climates. THERAPION Is sold by principal out the world. Price in Regiand 1/8 per packe. In ordering, state which of the three numbers resurred, and observe above Trade Mark, which is a fac-timile of world Therapion as it appears on British Government. Btamp (in white letters on a red ground) affixed to mery package by order of His Majesty's Hoa. Commissioners, and without which it is a forgery.

Sole by all Chemista.
